Profile Summary

Highly motivated Computer Science undergraduate with hands-on experience in cybersecurity, machine learning, and AI-driven application development. Previously intern at DRDO (Networking) and contributing as a Tech Lead Intern in LLM-based AI projects. Skilled in Python, FastAPI, Streamlit, Git, and model deployment, with experience building end-to-end systems including fraud detection platforms, malicious URL detectors, and intelligent chatbot applications. Passionate about ethical hacking, secure systems design, and AI-powered cybersecurity solutions..

Education

Stanley College of Engineering and Technology for Women

Bachelor of Engineering (B.E) in Computer Engineering (CME)

2023 - 2027

CGPA - 8.05

Work Experience

Research Intern | Networking & Cybersecurity | DRDO-DRDL | Hyderabad, India | May 2025 - Jun 2025

- Worked on networking and secure communication systems in a research-driven defense environment.
- Analyzed network architectures and studied secure data transmission protocols.
- Assisted in vulnerability assessment and understanding threat models in controlled systems.
- Gained practical exposure to cybersecurity fundamentals aligned with national defense applications.
- Strengthened knowledge in Computer Networks, Operating Systems, and secure system design.

Summer Intern | Swecha Organisation | Hyderabad, India | May 2025 - Present

- Conducted end-to-end testing of AI-driven applications, validating workflows, identifying bugs, and ensuring system reliability across frontend, backend, and model integration layers.

Projects

ClaimWatch AI – Intelligent Fraud Detection System

- Built an end-to-end insurance fraud detection platform combining supervised ML and anomaly detection with explainable AI insights.
- Tech Stack: Python, Scikit-learn, FastAPI, Pandas, SHAP, Streamlit.

SmartScan Attend – QR-Based Attendance System

- Developed a secure, role-based attendance system with QR authentication, IP validation, and real-time analytics dashboard.
- Tech Stack: Python, Streamlit, SQLite, HTML/CSS.

Travel Guru – AI Chatbot

- Designed an AI-powered travel assistant that generates location-based suggestions using transformer models.
- Tech Stack: Python, Hugging Face Transformers, Streamlit.

Technical Skills

- AI & Machine Learning: Large Language Models (LLMs), Natural Language Processing (NLP), Transformers, Fine-Tuning, Prompt Engineering, Supervised & Unsupervised Learning, Anomaly Detection, Scikit-learn, SHAP (Explainable AI), Model Evaluation
- Data Science: Pandas, NumPy, Data Cleaning, Feature Engineering, Data Preprocessing, Exploratory Data Analysis (EDA), Statistical Analysis
- Backend & DevOps: Python, C, SQL, FastAPI, REST APIs, Streamlit, Git, GitLab, API Integration
- Cybersecurity & Networking: Computer Networks, Network Security Fundamentals, Vulnerability Analysis, Malicious URL Detection, Secure System Design Basics, Wireshark, Nmap
- Developer Tools: VS Code, Jupyter Notebook, Linux (Kali Linux Basics), SQLite, MySQL

Achievements

- Event Management: Led logistics and design for 4+ major college events, including an international conference with 500+ attendees, resulting in zero logistical faults and high participant satisfaction.
- Mentorship & Contribution: Mentored 10+ junior students in academics and career planning; developed the daily standup automation module for the open-source GitLab Utils project
- Participation – NULL Community Meet (Salesforce, Hyderabad): Attended and engaged in cybersecurity discussions with industry professionals, expanding practical knowledge and professional network.
- AI Days 2025 – Swecha: Participated in AI-focused technical sessions and community interactions, strengthening understanding of emerging AI technologies.

Certifications

- Cybersecurity Analyst Job Simulation – Tata
- Introduction to Cybersecurity – Cisco
- Cyber Job Simulation – Deloitte
- Foundation of Cybersecurity – Google
